### Industrial

Property Solutions has always held a strong industrial portfolio. We have developed significant project expertise in this market sector through undertaking industrial land subdivisions, design and construct projects for individual tenants and providing turnkey solutions for owner occupiers in the key industrial precincts around the greater Brisbane area.

Our industrial portfolio contains significant land holdings in the Yatala Ormeau area south of Brisbane, and holds other key assets in Pinkenba, Darra and Hendra. The group has recently added a Joint Venture project in Maryborough on The Fraser Coast.

Property Solutions is able to take industrial projects from conception to completion and we see our expertise in the assessment and development of raw industrial land. Property Solutions also deliver built form packages for industrial occupiers. This ranges from standard warehouse buildings through to complex industrial facilities requiring an in depth understanding of occupier requirements. In recent years, Property Solutions have provided state of the art industrial premises for The Spotless Group, Miele, LEP, Reward Distribution, Norman Ellison Carpets, CMC Coil Steel, Marbletrend, Geofabrics, Citi Steel, Amerind and CrimSafe.
